Summary

Full-Stack Developer with 4 years of experience designing and delivering scalable, production-grade applications, RESTful APIs, and multi-tenant SaaS platforms. Built and maintained platforms in healthcare and e-commerce serving 10,000+ users, with hands-on experience in microservices, payment integrations, cloud infrastructure, and distributed systems. Skilled across the full development lifecycle, from system design and backend architecture to frontend development and deployment, with experience integrating AI capabilities using LangChain.

Technical Skills

Backend: Python, Django, DRF, Celery, GraphQL, REST APIs, Node.js, Express.js
Frontend: React.js, JavaScript
DB: PostgreSQL, MongoDB, Redis, SQL
Tools: Git, vscode , Claude ,Codex, Postman, Sentry
Cloud: AWS, Docker, Git, CI/CD, Ngnix

Work Experience

Full Stack Developer May 2026 – Present
Aura Technologies — Product-Based Company *Remote*
- Architected scalable backend services for a multi-tenant insurance platform supporting B2B and B2C workflows using Python, Django, and PostgreSQL.
- Contributed to React.js dashboards and automated workflows, streamlining insurance operations and improving user experience.
- Co-led a small development team, coordinating task assignments, code reviews, technical decisions, and end-to-end feature delivery.

Backend Developer Feb 2024 – May 2026
DoctusTech — Product-Based Company *Remote*
- Architected backend for healthcare SaaS serving **5,000+ U.S. medical professionals**.
- Help in building React.js admin dashboard with automated workflows
- Implemented **Redis caching**, reducing API response time by **50%** for high-frequency endpoints.

Web Developer Mar 2023 – Feb 2024
Brimo Software Solution *Lucknow, UP*
- Deployed loyalty program on *plixlife.com* .
- Integrated **Stripe** processing 2,000+ monthly transactions; optimized MongoDB queries cutting load time by **45%**.
- Built loyalty system (wallets, coupons, referrals) and **multitenant SaaS** for 15+ clients.
- Implemented Stripe & Shopify API integrations; engineered RESTful APIs with **sub-200ms** response times.

Projects

Kull | *Nodes.js, Express.js, MongoDb, Redis*
- Built a social backend platform where users can join their **Kull** (community group), share posts, and receive real-time updates — similar to a niche social media feed with group-based content delivery.

AI Automation Tools | *Python, LangChain, RAG*
- Built a **Timesheet AI Agent** for automated log parsing and an **Insurance RAG System** for intelligent document Q&A using vector-based retrieval.

Stratix | *NestJS, React.js, PostgreSQL*
- College marketplace with JWT authentication, product listings, search, and real-time messaging built on a modular NestJS REST API.

ChitChat | *Node.js, Socket.IO, React.js*
- Real-time chat application supporting **50+ concurrent users** with low-latency bidirectional messaging via WebSockets.

Education

Master of Computer Applications (MCA) 2021 – 2023
IET Lucknow *Lucknow, UP*
Bachelor of Computer Applications (BCA) 2018 – 2021
BBDU Lucknow *Lucknow, UP*

Achievements

AIR 81 in UPMCA Entrance Exam 2021 among **50,000+ candidates** statewide.
Management Head, CHETNA Society — organized **12+ technical and cultural events** at IET Lucknow.
Jury Member, Hack x VidyoYouth '26 Hackathon at IET Lucknow — evaluated student projects on technical execution, problem-solving under constraints, and solution clarity.
